## PROJECT GENESIS

Surviving Alpha One - With a Team of 17!

FREE POSTER!

## EXPEDITION 231

Captain Stark and his glorious crew last transmitted from Sonos X45, about one year ago. Sonos, a habitable, yet frozen planet in quadrant Alpha One will one day serve humanity as a winter wonderland resort for families. No signs of danger have been reported.

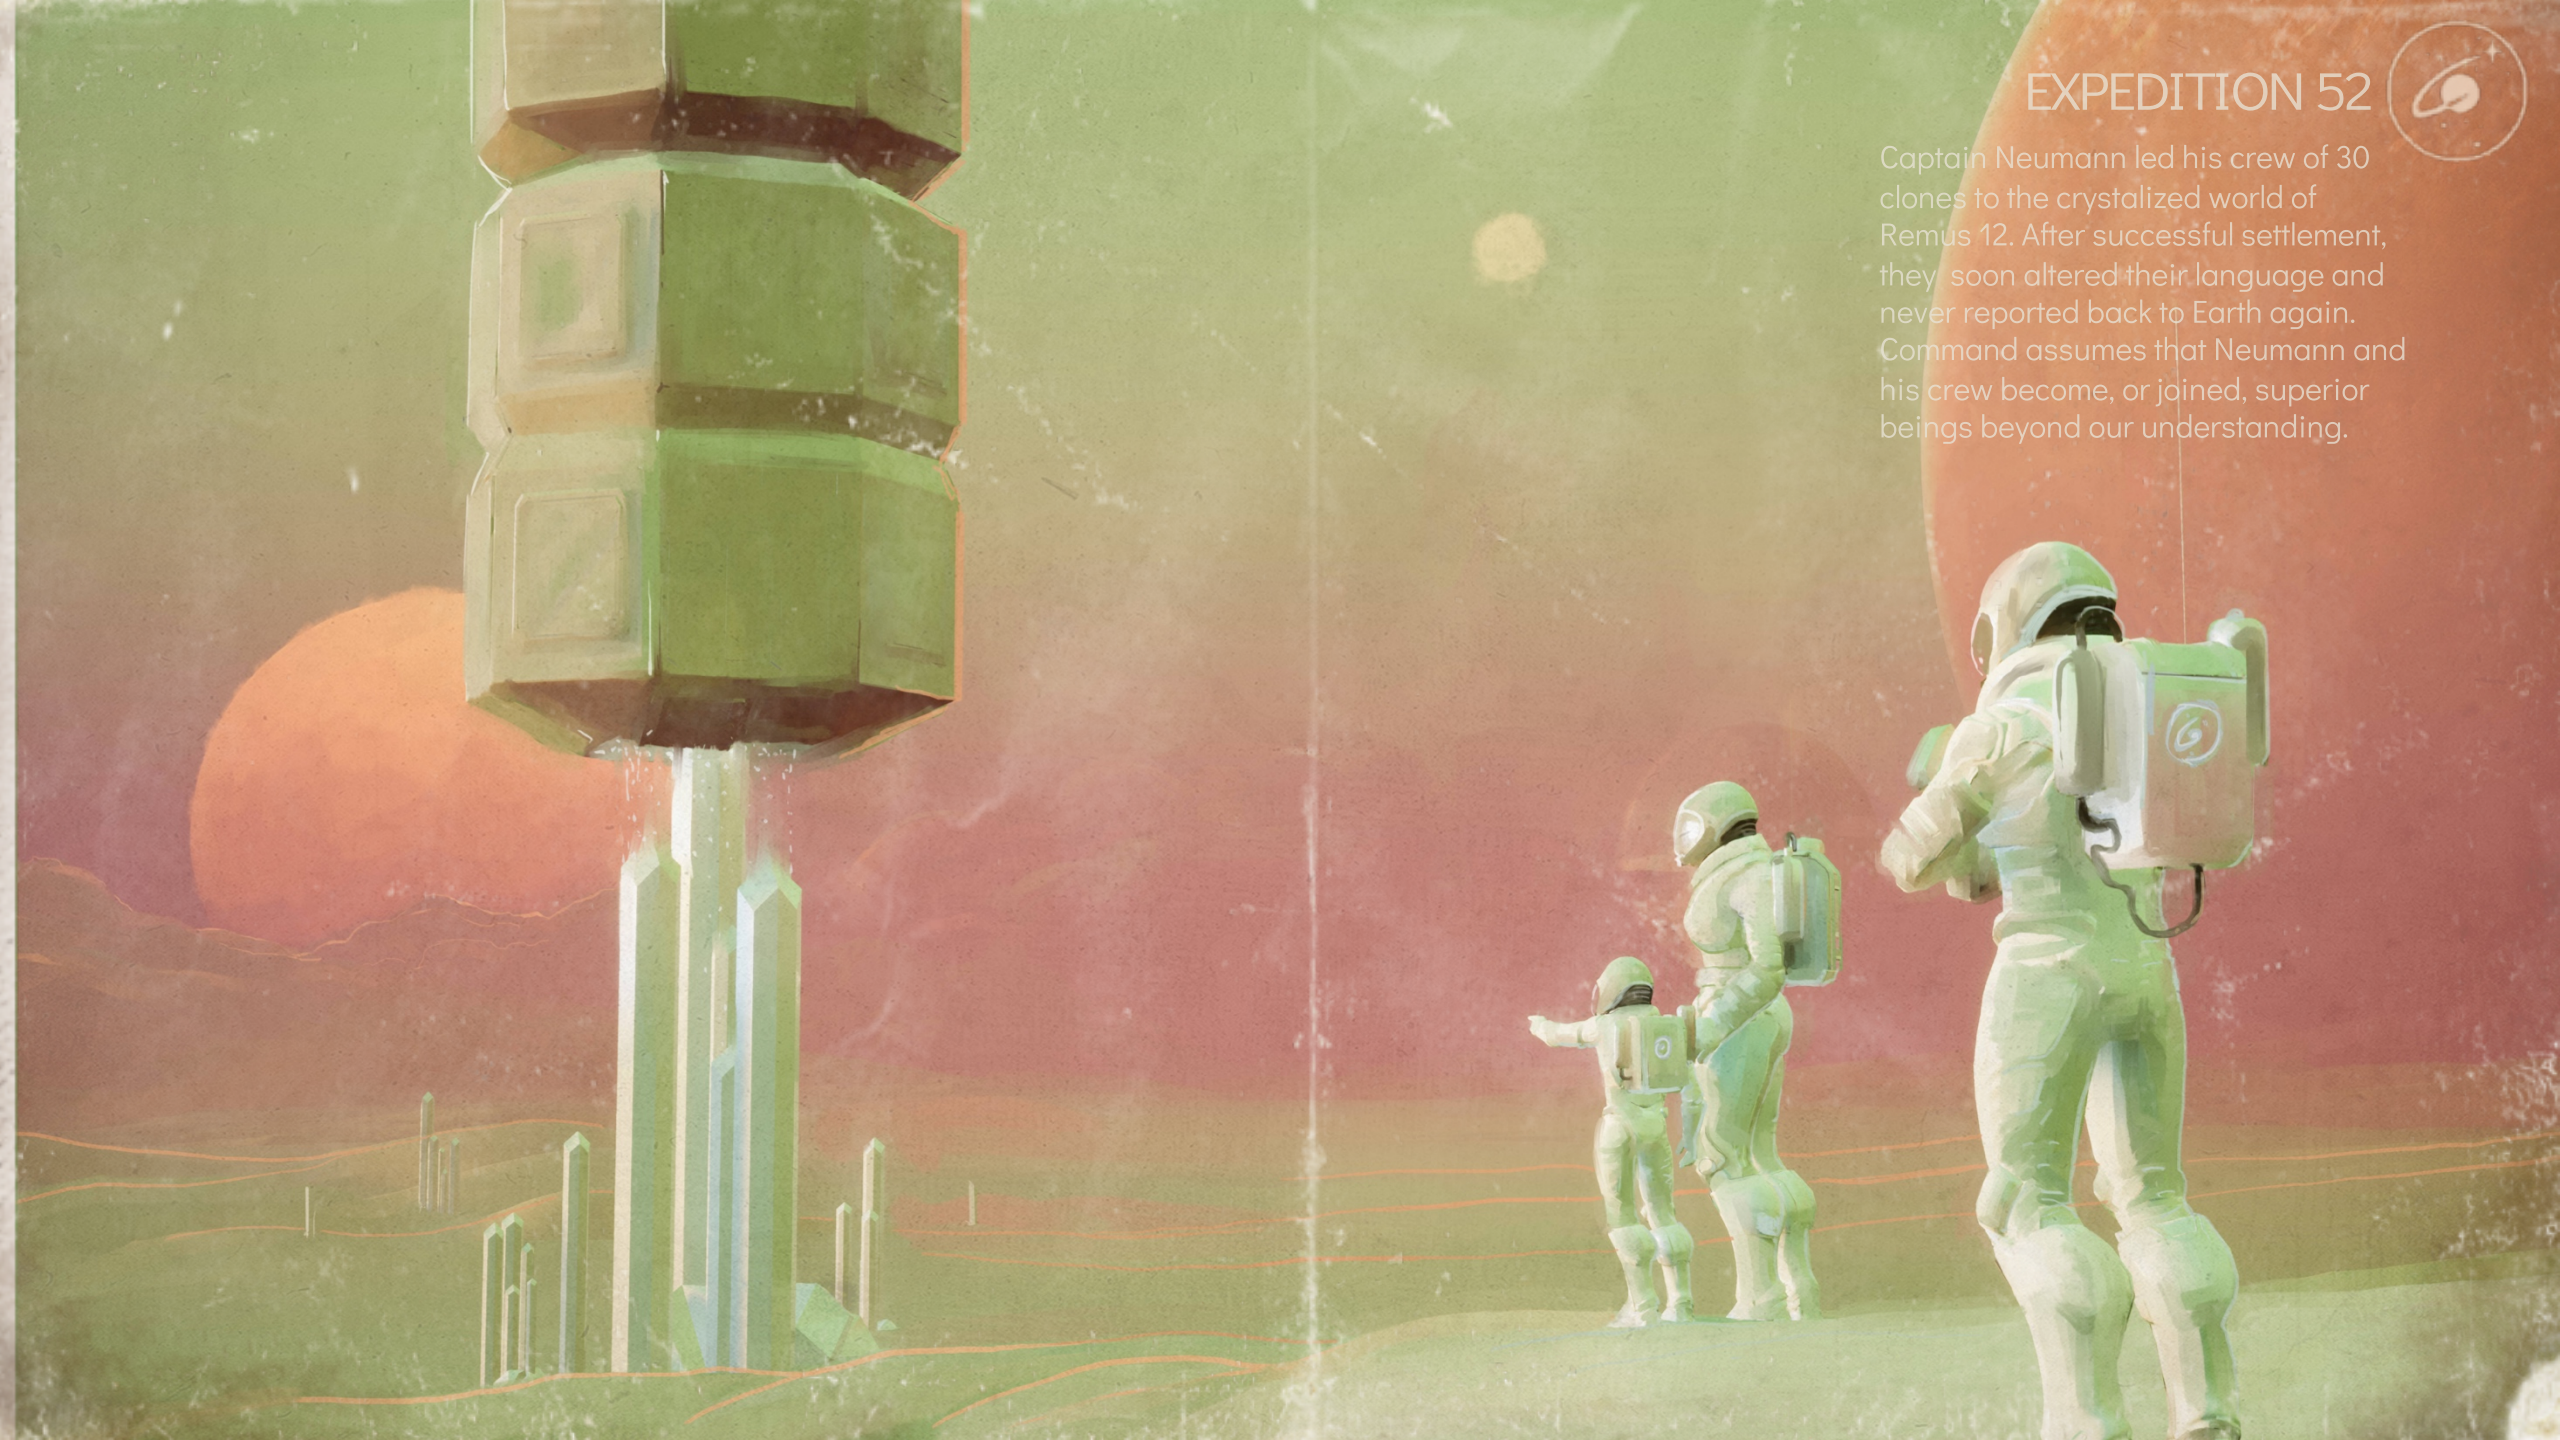

## EXPEDITION 52

Captain Neumann led his crew of 30 clones to the crystalized world of Remus 12. After successful settlement, they soon altered their language and never reported back to Earth again. Command assumes that Neumann and his crew become, or joined, superior beings beyond our understanding.

## EXPEDITION 47

Captain Elaine Ramirez  
founded a vital, spirituality  
driven colony on Joseph  
M265. More Genesis ships  
are on their way to M265 to  
join the colony.

## EXPEDITION 13

This promising expedition has already been featured twice in our magazine. Captain Murdock's highly specialized crew is expected to find the most magnificent, family friendly and totally safe places for settlement. Unfortunately, Murdock's last transmission dates back several months now, was kind of hard to read...and was labeled "Don't worry - we will make it!".

## EXPEDITION 1

Unknown technology blueprints transmitted by Major Thomas Phelps, legendary Commander of Genesis 1, led to magnificent improvements in artificial intelligence on Earth and revolutionized interstellar exploration devices.

MODULE BAR / LOUNGE

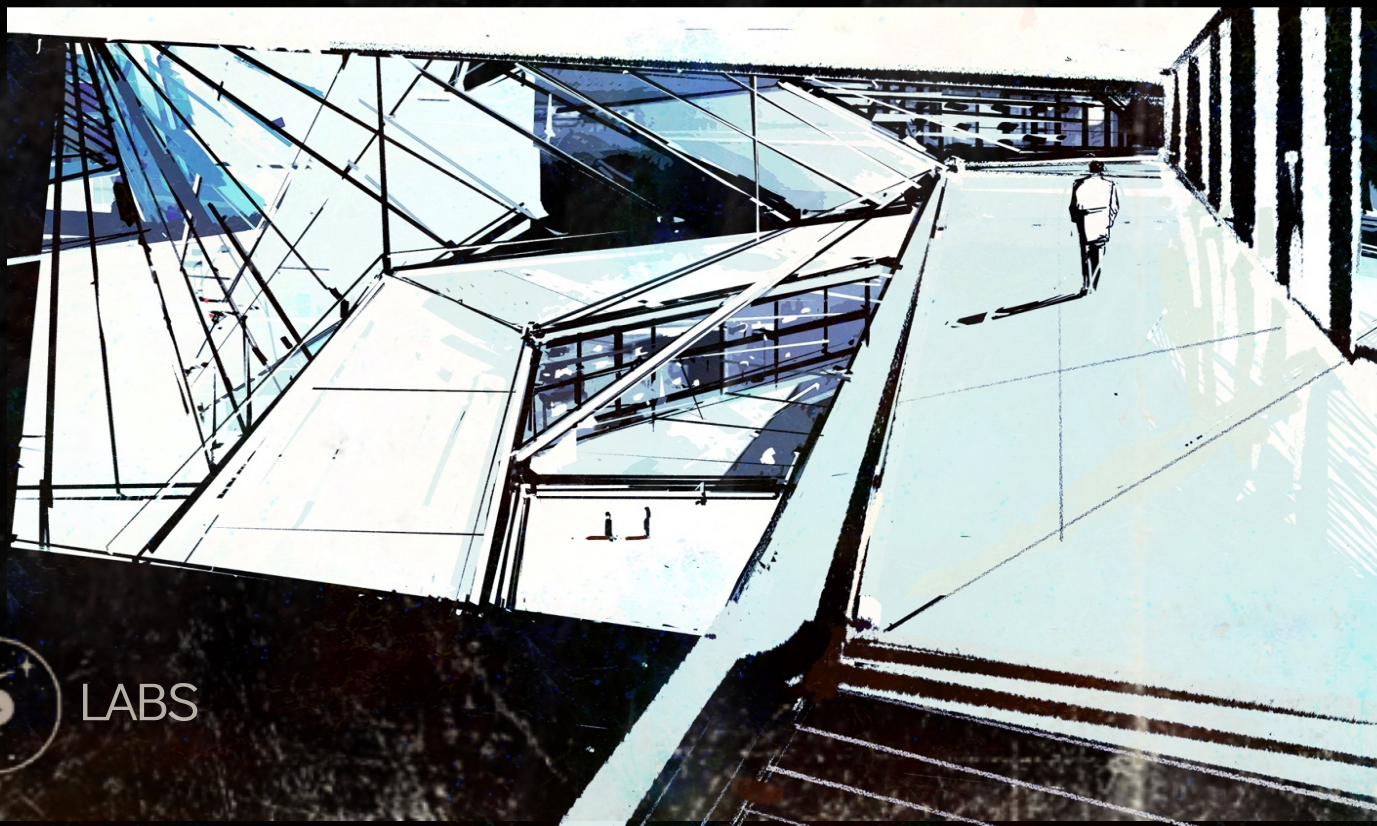

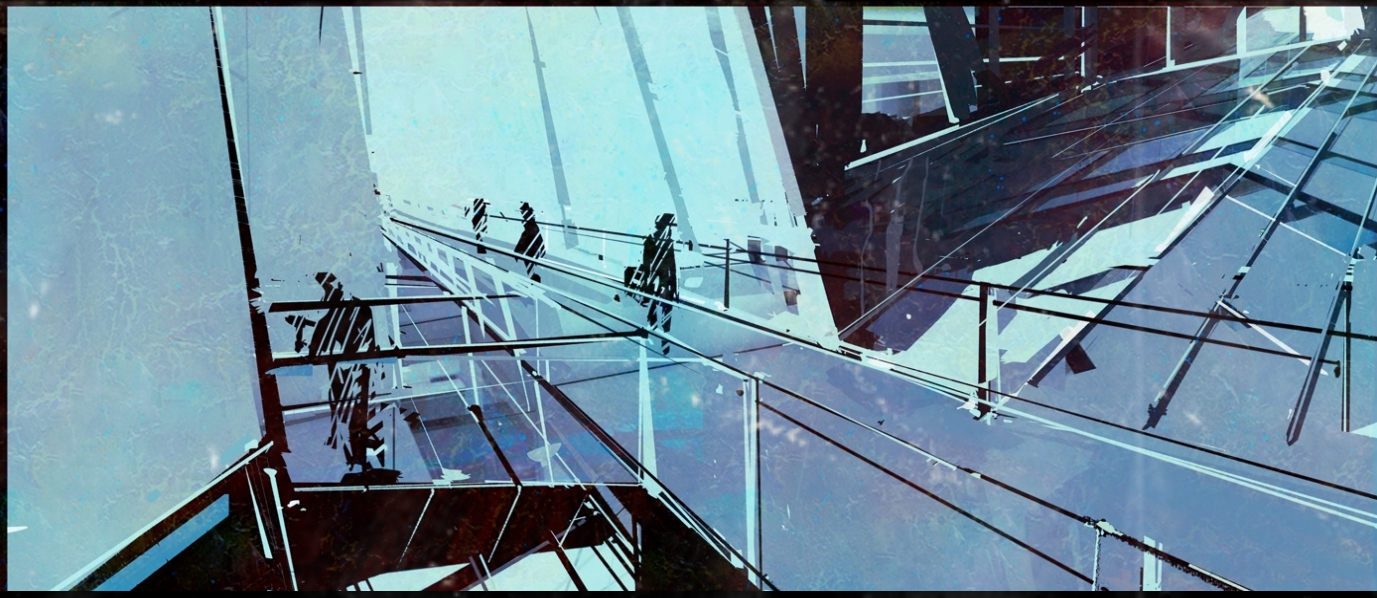

MODULE BAR II

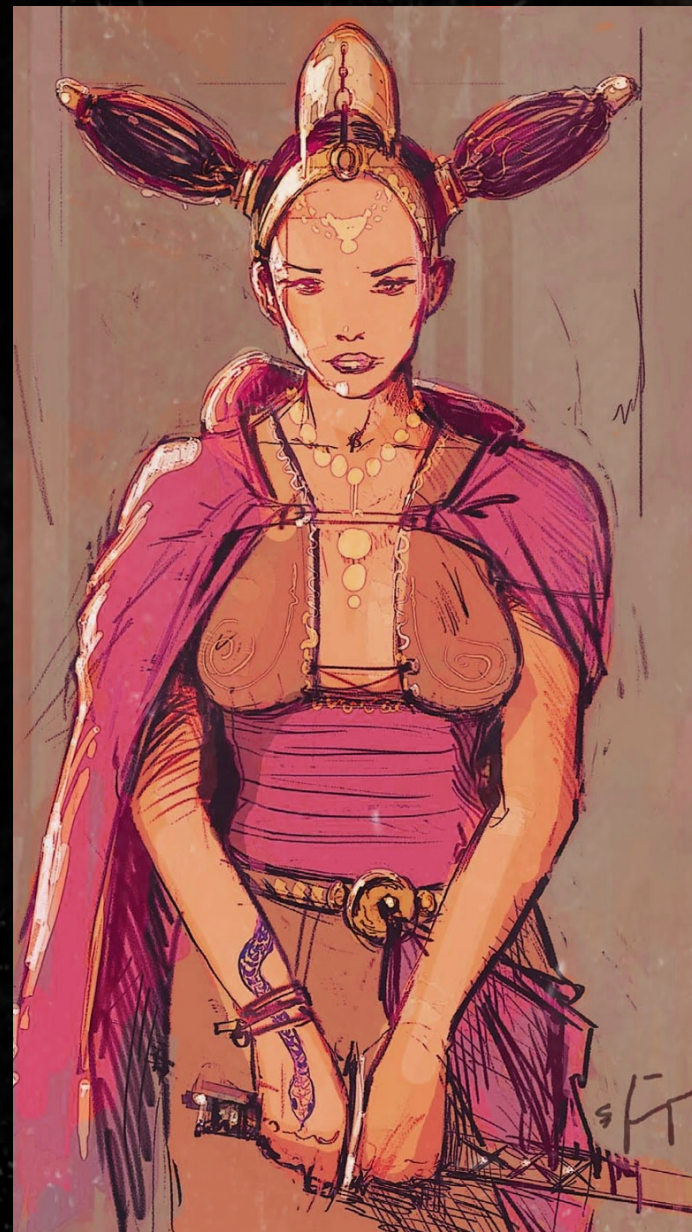

## MODULE BORDELLO

Clones assigned to these modules are trained to satisfy and to sharpen combat senses. Only available in Genesis ships generation IV+

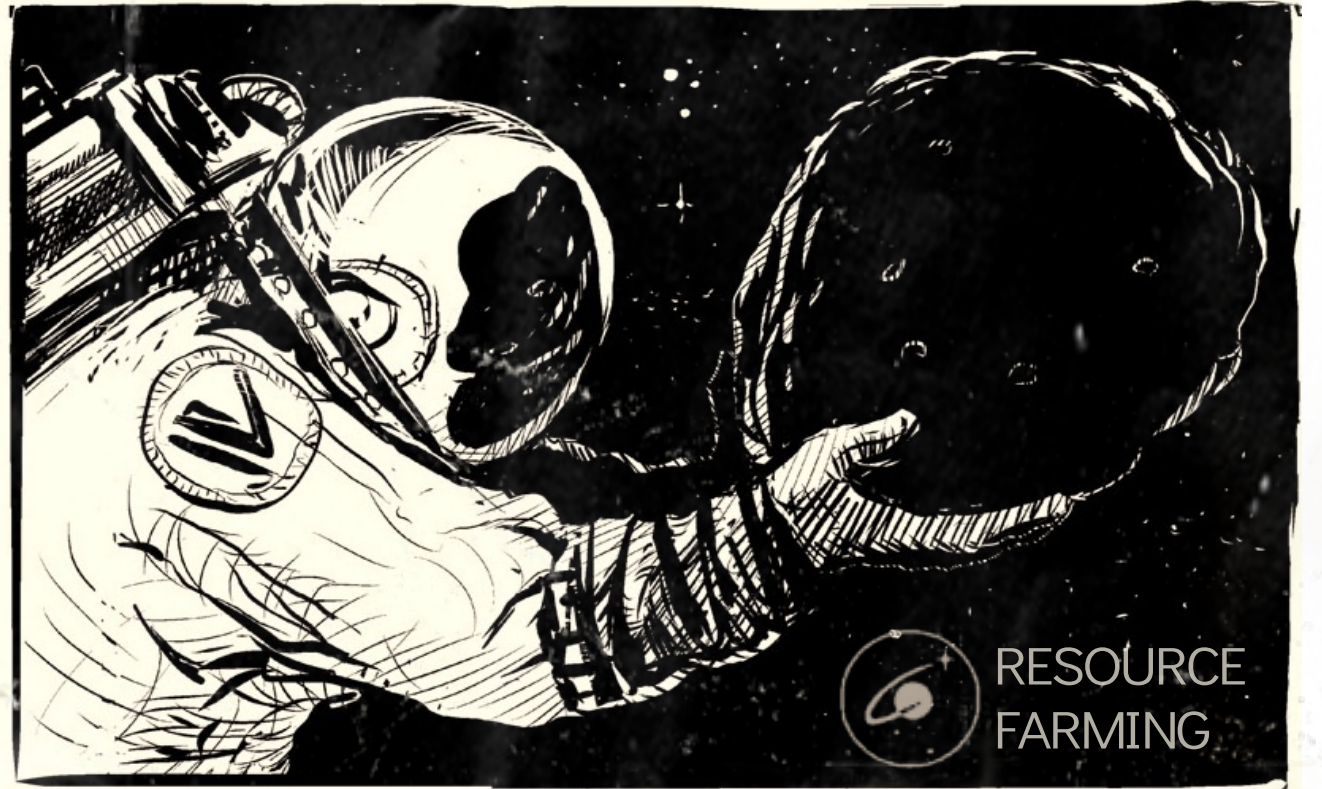

## MODULE GALLERY

Only clones who understand the arts can become fully human one day.

RESOURCE  
FARMING

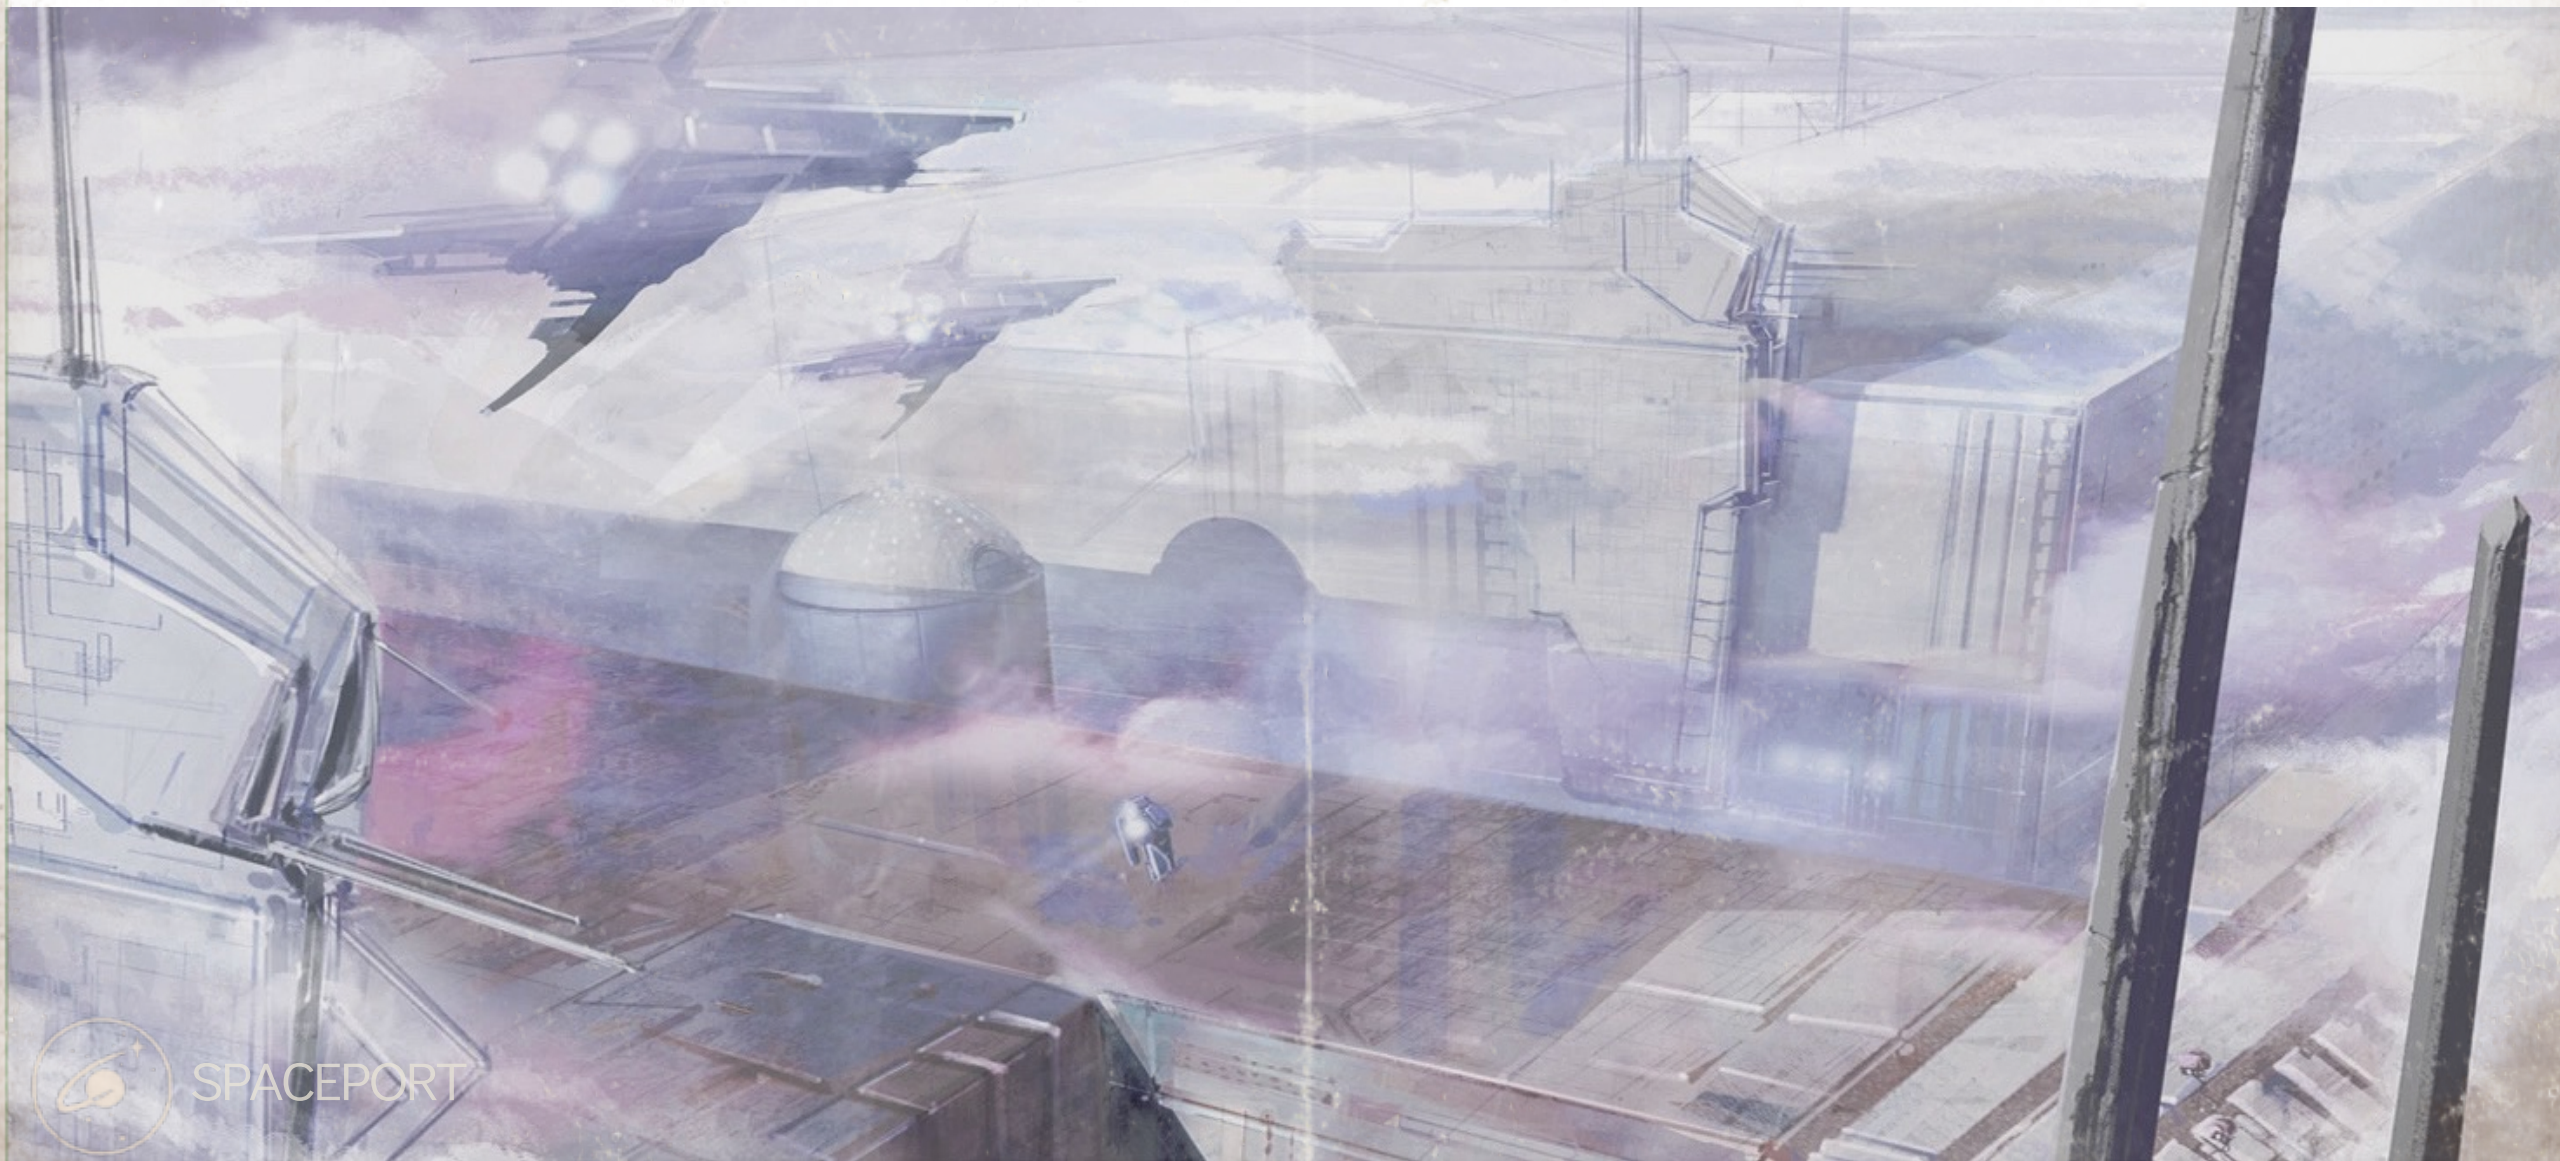

# COMBAT SUIT

The universal combat suit features slots for upgrades and alien abilities. Each Genesis Captain benefits from this technology marvel.

SPACEPORT

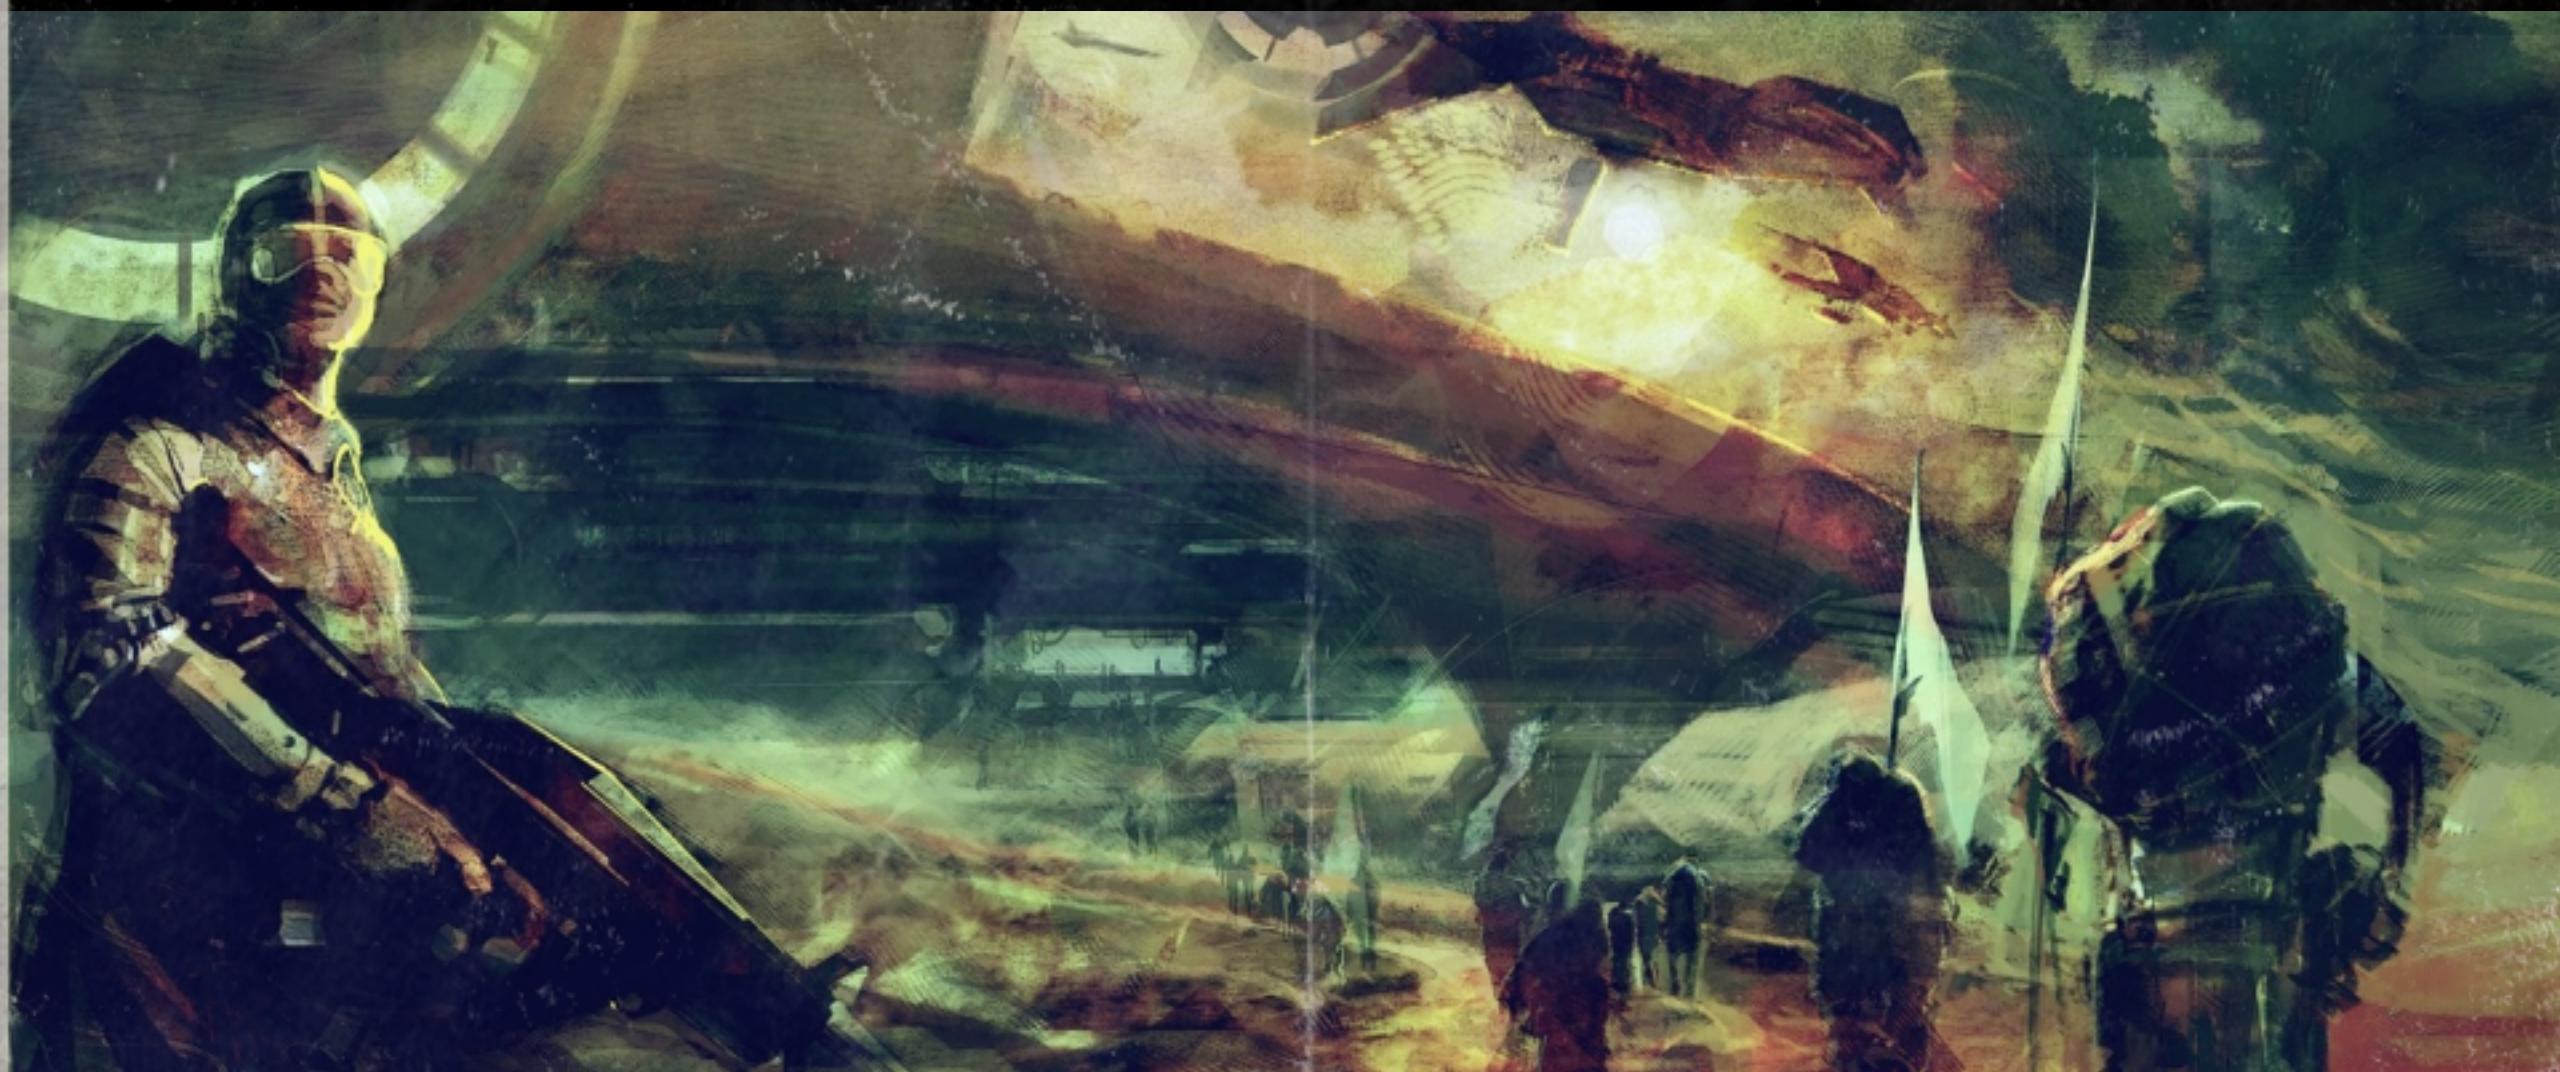

Our pilots share the most advanced gene-pool available.
